About

Front-End Developer with 4 years of experience building web applications with React, Next.js, Remix.js and TypeScript at Gameloft. Coming from a graphic design background, I care about interfaces that are clean, fast, and maintainable — and I enjoy owning products end-to-end, from first commit to production.

Experience

Gameloft — Front-End Developer 📅 May 2022 - present

React

Next.js

Remix.js

TypeScript

Tailwind CSS

Jotai

Strapi

Figma

- Built and maintained responsive, high-traffic web pages and marketing sites for Gameloft's global products using React, Next.js, Remix.js and TypeScript.
- Translated Figma designs into responsive, cross-browser-compatible interfaces.
- Improved page-load performance through code splitting, image optimization, and bundle-size reduction.
- Developed a library of 20+ reusable UI components, cutting feature-development time and keeping the UI consistent across projects.
- Managed site content with Strapi CMS and integrated GraphQL and REST APIs in collaboration with backend engineers.
- Collaborated with designers, backend engineers, and PMs in an Agile team on weekly release cycles.

Earlier: 4 years as a Graphic Designer before transitioning into front-end development via CyberSoft Bootcamp.

Featured Project

Furniture E-Commerce Store

Next.js

TypeScript

Tailwind CSS

Strapi

Jotai

Vitest

A furniture e-commerce site with a complete purchase flow — browsing, cart, checkout, and order confirmation — backed by a decoupled Strapi CMS. Cart, wishlist, and order data persist via Jotai, with session-based auth on protected routes. Tested with Vitest, and scores 100 on Lighthouse Accessibility.

🐙 github.com/ngohuynhducdev/ecommerce

Web Studio

Next.js

TypeScript

Tailwind CSS

Vitest

A template-driven landing page platform for small businesses, starting with three spa templates: clients choose a design, customize content through a headless CMS, and publish to their own domain. Tested with Vitest.
